

PRESS RELEASE
For Immediate Release

P.G.L. Transportation Engineering and Planning Ltd. Hires Dov Hoffman as General Manager

Tel Aviv, March 1, 2010 — P.G.L. Transportation Engineering and Planning Ltd. (PGL), a subsidiary of Delcan Corporation, is pleased to announce that Mr. Dov Hoffman has accepted the General Manager position. Dov will be responsible for developing and implementing strategic plans, conducting business development, developing staff talent, furthering client relationships, managing all operational and P&L accountabilities for the Tel Aviv region and ensuring continued technical excellence in project implementations.

Dov has over 30 years of experience in infrastructure development as a professional Civil Engineer. Before joining PGL, Dov was Chief Engineer for Netivey Hayovel, working on the Road 431 project, a two billion NIS project. His responsibilities included the preliminary design, feasibility studies, contract administration with suppliers and sub-consultants, project management, operational planning and business development. Prior to Netivey Hayovel, Dov worked as the Chief Engineer for Derech Eretz concessionaire. Previously Dov owned a private firm which specialized in infrastructure design and project management consultancy services.

Charles Orolowitz, President of Delcan's Infrastructure Business, Canada & International Operations (ICI) and Director of Delcan Group Inc., issued the following statement upon Dov's hire, "Dov is an outstanding industry leader with a strong track record in implementing, planning and directing large infrastructure projects. His outstanding technical skills, coupled with his strong management capabilities, will benefit PGL greatly. We are honored and delighted that he has decided to join our team."

In receiving his new position with PGL, Dov Hoffman stated the following, "I am honored to join one of the leading planning and engineering firms in Israel and believe that my 30 years of experience will compliment PGL's outstanding team. I have been impressed with the importance that PGL instills in its human assets and believe that the firm has a strong foundation for success. It is a great privilege to lead this team and to be associated with an exceptional organization."

P.G.L. Transportation Engineering and Planning Ltd. (PGL) is a leading firm in Israel in the transportation field. The company offers a wide-range of services specializing in all areas of transportation planning, traffic engineering, signing, road planning and design and civil and military infrastructure for both the public and the private market. In all areas, PGL places a strong emphasis on leadership, innovation and environmental and social responsibility. Since its establishment in 1994, the company has enjoyed continued growth and success, influencing and leading trends in the areas of its expertise. PGL is currently one of the larger engineering companies in Israel, employing over 60 employees in Tel Aviv.
